Quick Check

The Class of 2018 have multiple ways to meet graduation requirements. EMIS data will be used to determine which pathway(s) the student meets. The graduation reports will aid in determining if EMIS data has been reported correctly.

- What are your district's graduation requirements?
- Who is monitoring students' pathway progress?
- Who in your district do you work with to validate this data?

Locating the Reports

The screenshot shows the 'Reports' tab selected in the Data Collector. The 'Reports' sub-tab is also selected, and the 'Received Files' link is circled in red. A callout box points to the 'Received Files' link with the text: 'In the Reports tab of the Data Collector, select Received Files'. Another callout box points to the 'Received Files' link with the text: 'Use filters to narrow the search for files or use blank filters to see all received files'. Below the 'Received Files' link, there is a 'Filter Options' section with various dropdowns and textboxes for filtering. At the bottom left, the 'List Files' link is circled in red, with a callout box pointing to it that says: 'Select "List Files" to view the received files'.

Prepare the Report

- Open 2018_GRAD_Cohort-EOC-Path-Req-Stat_2018XXXX.xls
- Prepare your report for analysis
 - Select header row and wrap text
 - Freeze top row
 - Justify column width
 - Apply filters
- Since this report does not contain names, we will demonstrate a VLOOKUP to add names

26

VLOOKUP to Add Student Names to a Report

The next series of slides will demonstrate how to use the VLOOKUP function to add names to your reports

- Add names to 2018_Grad_Cohort_EOC_Path_Req_Stat
- Use the Student Demographic (GI) File from the FY18 Student End of Year collection in the data collector to add student names to the file
 - This file will contain most of your on time graduates and others can be manually added after the VLOOKUP is completed
 - Another file of your choice that contains student names and SSIDs could be used in this process

27

Open Demographic File

Cut column H, and insert cut cells into column A

The SSID column needs to be moved to the left side of the report

Building a VLOOKUP Function

- To build the VLOOKUP Function, we need
 - The value to lookup (SSID from Grad_Cohort_EOC_Path_Req)
 - The range of cells on the Demographic (GI) file to find the values
 - The column number within the selected range that contains the value to return (from the Demographic (GI) file)
 - Exact Match (FALSE)
- The next series of slides will demonstrate the VLOOKUP function step by step and then will demonstrate the VLOOKUP Wizard

31

VLOOKUP Step One

Pathway File Needing Names

Select Cell H2 on the pathway report and type =VLOOKUP(

Place your cursor in cell A2 and drag over and down to select all values on the Demographic file

34

VLOOKUP Step Four

Pathway File Needing Names

The VLOOKUP values will automatically appear in the formula bar on the Grad_Cohort_EOC_Path_Req report based on the value range selected from the demographic spreadsheet

Enter a comma after the last value in the formula

VLOOKUP Step Five

Pathway File Needing Names

Indicate the column on the Demographic file that contains the value to bring back. In this case it is column number 6. Add a comma after the 6.

To bring back the exact value from column 6, add "FALSE" and then close the function with a parenthesis ")"

VLOOKUP Step Six

After pressing "Enter" the student's last name appears in the search.

Click at the bottom right of the H2 cell and get a + symbol and then drag down or double click to populate the same function into the cells below.

The same process can be done to bring in first and middle names into the Prep for Success report.

Quick Check

Graduation reports are currently available as Received Files and will be transitioned to Level 2 Reports during FY18 Graduate reporting. Since current reports do not contain names, it is important to be proficient in using the VLOOKUP function in Excel.

- Can you access graduate reports in the Data Collector?
- Are you able to prepare the reports for review?
- Can you add names to the report using VLOOKUP?

Quick Check

Graduation reports contain EMIS data that is used to determine if the student has met one or more graduation pathways. The data should be reviewed now to look for additional EMIS data that still needs to be reported.

- Are all expected 2018 cohort students appearing on the reports?
- Is there EMIS data missing from the report that needs to be reported?
- Are these reports being shared with others in the district to verify accuracy and completeness of the data?

Troubleshooting the Graduation Rate Report

Graduation Rate Report

- New Level 2 Report in FY18 Graduate Collection
 - Will contain 2018 cohort students
 - Will contain 2018 cohort students who enrolled or withdrew during 17-18
 - These students will be added or will show as removed from the 2018 cohort
- 17-18 four year graduation rate will appear on the 18-19 Local Report Card (LRC)
- Previous version of the Longitudinal Graduation Rate reports are no longer generated as of FY18

Graduation Cohorts

- A cohort refers to a group of students who are expected to graduate on time during a specific school year
 - If the student was placed into a cohort in FY14 or prior, they will remain in that cohort
 - If reported in FY14 as a ninth grader, the student would have been in the 2017 cohort
 - Continuously enrolled students will be placed into a cohort based on grade level (first time reported in 9th grade)
 - Students reported for the first time in FY15, FY16, or FY17, ODE looks for this SSID enrolled anywhere in a prior year
 - If found in a prior year, grade level is used to determine the student's cohort
 - If not found in a prior year, Fiscal Year Began Ninth Grade is used to determine the student's cohort
 - Check the student's grade level and Fiscal Year Began Ninth Grade value
 - Check the student's data in ODDEX to determine when they were placed into a cohort

Graduation Cohorts, cont'd

Student is appearing in a cohort at an unexpected district

- Student reported as withdrawn to another district but remains in the withdrawing district's cohort
 - SSIDs whose withdrawal was reported with an incorrect date or reason in a prior school year, and SSIDs for whom the EMIS reporting entity has received new information since the withdrawal was reported which indicates that the withdrawal reason should be updated in order for the student to properly count within the graduation rate
 - Report a Student Withdrawal Override (FC) Record to report a correct withdrawal code
 - Retain documentation to support this change

Graduation Cohorts, cont'd

Student withdrawn to another Ohio public school and is enrolled there with a different SSID

- If student appears in the graduation cohort for the withdrawn district and the data is within a closed collection
 - The withdrawn from district should deactivate their SSID and link it to the SSID that the enrolled district is reporting
 - Verify that this process removes the student from the withdrawn district's graduation cohort

Graduation Rate Report

Additional information will be added once the report is finalized and available to districts

ODDEX History Grad

ODDEX History Graduation Data

A new tab for graduation data is being added to ODDEX History that will contain events such as

- Enrollment and withdrawals
- Student withdrawal overrides
- Student cohort placement
- Graduation pathways met Y/N
- Student subgroup data (disability, disadvantage, etc.)
- SSID deactivations and changes
- Accountable district/building

ODDEX History Graduation Data, cont'd

Additional information will be added once data is loaded into ODDEX and available to districts

Summary

Graduation reports are undergoing extensive changes in FY18 some of which are still in process. Districts should continue reporting updated graduate data and monitor current reports. The new graduation report will be available in the data collector which will require an updated version of the Graduate Collection. Watch for an EMIS Newsflash and review the release notes from the updated version. This presentation will be updated as additional information is received.
